

The Free Radio meeting in Burscheid

October 15th, Europe saw the annual Free Radio meeting at Burscheid, Germany organized by the **Free Radio Campaign Germany** (FRCG). More than 50 people participated during that bright day and in fact more than 25 operators were on hand. Nice chats were made discussing the main business – offshore and landbased Free Radio – at it's best!

The offshore freaks always watched videos – old and new ones – most of the time. Most interesting news were of the new **Holland FM** outlet from board of the ex-Laser 558/Laser Hot Hits 576 ship **MV Communicator**. The station is going to broadcast on 1224 AM as a relay station of the commercial broadcaster from its anchor point in Ymuiden harbour (Holland). Rumours say that the **VOO Veronica Omreop** is going to take over the ship in the near future.

Lots of offshore stuff was offered here too – records, CDs, videos, photos, stickers and books etc. made it to their fans.

On the other hand landbased Free Radio lovers had the majority the day and they discussed the German scene, QSL policy, relay and tape pirates, and no doubt the main point was the disagreement among the German stations! Eccentrics, sapheads, dogs in the manger, blacksheeps and of course all that know-alls, know-hows and know-nothings had their very own problems of their identity! Anyway, some interesting new connections were made and may have effect soon!

Aside from some nice guys from Holland like the operators of **Pedro Radio** and the **Free Radio Service Holland** only German stations – actual and former ones – were present and here is a small list:

Rainer Brandt
Wiesenweg 6
3101 HÖFER/CELLE
GERMANY

ABC Germany (1977), Antenne Mainland, Antenne West, Benelux, Clandestine R. Society, Crazy Wave, Driland, Dr.Tim, Eifelwelle, Fan Man, Galaxy (1988), Gloria (1976), Helgoland, Illusion, Jessica (1986), Joystick, KNMS, Nordlicht, Paradise, Peace in Action, Perfekt, Popcorn, Satellite BC (1983), Schlitzohr, Skyline FM, Sockenschuss, Star Club, Titanic, Unversum, WGPO, Wahnsinn, 46 Radio.

No doubt several operations changed their names during the years. Of course this list is incomplete because some guys refused to tell who they were! It's a shame!

The German Free Radio DJs who can be heard on different stations being guests were **Johnny Best, Danny Kay, Stefan Kramer, Simon Hendrix** and others! All the guys took the opportunity to remember good old **Johnnie O'Brian/Paul Huber** of the former German No.1 pirates **Radio Valentine/Radio Galaxy** who died aged 43 of gastric cancer in July.

Well, at least **Skyline FM** made it to the airwaves in a neighbouring city while participating the meeting and the signals were widely heard. The organizer hopes to see all next year again and some more foreign station operators as well.

Editorial

Christmas is the time when many of the pirates dust their transmitters and come on the air! What a great feeling, isn't it? We have got quite a lot of information about scheduled

Christmas broadcasts of different stations so it all looks very promising. Days to tune in to the pirates are especially Christmas Day and Boxing Day, but there will also be activity on Christmas Eve, December 27th which is a band holiday in the UK and New Year's Eve as well. So leave the Christmas ham for a moment and switch on your radio. Don't miss anything! This issue features **Radio Torenvalk International** – the well-known international mediumwave broadcaster from the mid 80's who recently returned to 6275 kHz on shortwave! Two Swiss pirates, **Radio Sparks** and **International Music Radio** tell their stories and their relationship. Moving back just one year, the Swiss pirate scene was totally dead. Maybe it will explode with stations, just like the Scandinavian scene did a few years back? There is even more good news from Switzerland. **Radio Madison** will return some time over Christmas! They haven't been active for 6 years and I think this return is no co-incidence! Those were the good news. The bad news, and this is really bad, is that our MW-expert **Derek Taylor** leaves the PC crew. He's been supporting both CPL & PC for several years and provided us with invaluable information. Unfortunately there is not enough space here to thank Derek enough for all what he has done, but just let me wish all the best success for the future and with his new job! Finally, thanks to all of you for supporting PC and let me wish you a very Merry Christmas and a Happy New Year 1995!

Stefan

EURO PIRATE SCENE

It's time for another report of Euro short-wave piracy. The conditions are very strange at the moment, with excellent reception one Sunday and very poor the next Sunday. 48 metres are better now comparing to a few months back, but conditions on 76 metres have become worse. Let's hope things will change for the better during the Christmas holiday next week! As usually, many stations will take the opportunity to come on the bands and it's also a great opportunity for us dedicated Free Radio DX-ers to get many stations in the logbook. Now let's look what has happened the last couple of months:

Angel Radio recently sent me a very nice reply along with a promotion jingle for **Pirate Connection!** The jingle was made by the female DJ **Hippy Chick** who is a top DJ and works at **Radio Hampshire Gold** when she doesn't make pirate radio! Thanks a lot to all at Angel! Angel broadcasts locally every weekend to East Hampshire on 105.2 MHz. In addition to this, Angel is heard on 6400 kHz once a month. Previously, programmes went out each week, but this was too much for Angel who now will concentrate even more on the FM broadcasts. A special Christmas programme will be aired on 6400 kHz some time during Christmas Day which will include taped season greeting from their listeners. Tune in to Angel! In my opinion, they are perhaps the nicest short-wave station at present!

SPZ

Angel is back! Your international friend

BP 130 92504, RUEIL, CEDEX, FRANCE

Radio Armadillo was heard on October 30th with test transmissions on 5824 & 6255 kHz between 14.40 and 15.30 UTC. The station had a strong signal at John's QTH in England. The power of this station is just 12 W feeded into a half-wave dipole, 3 metres above ground-level. BEFF JC

Radio Black Flag is a new German based station that was testing on September 25th & October 2nd on 6271 & 6221 kHz with just 4 W of power feeded into a halfwave dipole. During 1995, a 100 W power amplifier should be taken into use. The station concentrate their programmes on political and ecological issues. Contact address is c/o Mebo Info System at the Wuppertal maildrop address. RB

Champions Radio is a new Scandinavian based station who was heard for the first time on October 23rd via **Swedish Short-wave Relay Service** on 3925 kHz and later the same day on 6258 kHz. The programme contained well-known hits and featured a rather young fellow called **Tony Garcia**. LAY SPZ

The **Chelmsford** maildrop is closed!!! DTI investigators recently made it impossible for the operator of the box to continue the forwarding service. **Pirate Chat** can now only be contacted via SRS, Östra Porten 29, 442 54 Ytterby, Sweden. FRS JAL

Radio CLCG re-entered the shortwave scene on December 11th via the facilities of **Radio Baltic International** on 6206 kHz. The programme was now entirely in English with information on the current Free Radio scene. We will see more of CLCG during Christmas when they will be relayed again by Baltic. CLCG will have new QSLs, stickers and even T-shirts as from 1995. SPZ SRS

Die Stimme Der Deutschland/The Voice of Germany is a new station that soon will commence broadcasting on 76 metres via a relay. Keep your ears open! The station uses the SRS maildrop. SRS

Radio Dublin was reported on 6915 kHz on November 6th, but the modulation was very low. FRS

Radio Dutch Boy is an old encounter of the shortwave bands and revived broadcasting on November 20th on 6308 kHz after several years of absence. The station was rather active during 1986-87 on 48 metres, but went silent after that. The station was making a test transmission with a techno music format. Box 13 in Nieuleusen is still in use. SPZ

Radio East Coast Holland (c/f PC9) is back on shortwave after some time of inactivity. On October 23rd, the station carried out a test transmission on the odd frequency 6548 kHz. We can only congratulate RECH to a marvellous signal quality, good modulation and audio, among the best signals I've ever heard! On New Years Eve, the operator of RECH will take part in the traditional appearance together with **Radio Scotland** and **Voice of the Netherlands**. Tests on 76 metres are also expected. LAY SPZ

Radio Exklusiv is thought to be the name of a new station heard for the first time on December 11th on 6200 kHz. The station was heard at 13.14 UTC with CQ-calls and address announcements. The address is Box 105421, 40045 Düsseldorf in Germany. SRS

Radio Fan Man is a new station via **Radio Europe** on 7294 kHz. The station was heard on December 4th and uses the Wuppertal maildrop address. RB

FRS Holland has been one of the most popular pirates on shortwave ever since their first broadcast in 1980. On October 16th, the station celebrated their 14th anniversary with a broadcast on 6283 in parallel with 41 metres. On 48 me-

tres, the signal was drifting from 7414 to 7420 kHz. The signal strength was excellent on both bands however, and a couple of hundreds of watts should have been used. On December 18th, a Christmas programme was aired on 6284 kHz with good signal strengths. In that programme, **Peter Verbruggen** said that FRSH would probably make a New Year's Day transmission on either 7558 or 7420 kHz. According to a source, FRSH now use their own transmitters. FRS SPZ

FRS London was logged by me and a few other members of the Malmö Shortwave Club on October 23rd on 6303 kHz at 9.53. Music that was played were Enigma "Return to innocence" and Jan Hammer's instrumental classical tune "Crockett's theme". After that, an address was announced but the signal was too weak for deciphering it. Does anybody know their address? CES JTM SPZ

Heavy Dude Radio are back to 41 metres after having repaired their transmitter. The transformer had blown up and needed to be exchanged and this was done just recently. A number of test have been carried out in the 7415-7430 kHz range the last couple of weeks and at present 12 reports have been received, most of them from Germany. Heavy Dude Radio is now also contactable via SRS, in addition to my personal address. SPZ

International Music Radio, **Radio Sparks** and **Calypso Radio** will make a joint broadcast on Christmas Eve December 24th, most probably on 41 metres. FRS

Radio Madison, the well-known Swiss station, plans to return to the airwaves during the Christmas holiday. The last broadcast by Madison was on Christmas Day 1988 on 6200 kHz! The station can be contacted through the Wuppertal maildrop. RB

After having dreamt of a starting a Free Radio station for many years, **The Wizard**, operator of **Magic Spell** finally came to the airwaves in July this year. The transmitter has a power of 20 W and can be

used on both 48 & 76 metres. Frequencies used are 3927 & 3945 kHz on 76 metres and 6300 kHz on 48 metres. The station tested on 6300 kHz on December 18th, but I heard nothing at my QTH. Magic Spell is also known as **WMS**, "Whiskey Mike Sierra", a name which is used during QSO's. The station can be contacted via SRS. EA SPZ

Radio Marabu offer T-shirts for £10/\$20. The cost should include P&P. Marabu is heard every second Saturday at 12-14 and every third Friday at 18-20 UTC on 7125 kHz. Saturdays at 10-11 UTC on 7294 kHz USB. Sundays at 10-11 on 7294 kHz USB and 11-12 on 6235 kHz. Mondays at 19-22 on 6212 kHz. Address: Wuppertal. SPZ

Steve Most's Radio Pamela is back on 6300 kHz on a weekly basis. A fair signal was received here on November 27th. FRS SPZ

Jorge R. Garcia of **Radio Piraña International** (c/f PC9), went to South America with his family on December 20th. This time he didn't bring along any of his transmitters, but he will try to get hold of a transmitter as soon as he arrives to South America. Transmissions from there will be carried out on 48 metres, 13950 & 15050 kHz, provided that he gets the opportunity to transmit. Jorge will be back in Europe in February and Piraña will return to 48 metres then. SPZ

The new sixth edition of the **Pirate Radio Directory** is now available. For more information, write to P.O.Box 493, Lake Geneva, WI 53147, USA. Phone: +414-248-4845. BP

Radio Popcorn, **Radio Royal** and **Star Club Radio** were raided by the German GPO during their transmissions on November 13th on 6282 kHz. One of the operators was traced at the transmitter site and all equipment was confiscated. The GPO officials told the operators that several other German shortwave pirates have been traced and run a high risk of getting caught. Is this the end of German shortwave piracy? Some Free Radio people

believe so. At least the German pirates will face a very hard future! Radio Royal will return via Baltic on January 8th 1995 with a 5 hour mastodon programme on 6206 kHz. DO JAL LAY RB

Quarrel between the UK stations! Recently, there was a great commotion in the UK. It all started when **Andy Walker** of **WNKR** revealed the transmitting site of **Live Wire Radio** for unknown reasons. **Bill Lewis** of LWR then retorted by telling the site of the WNKR transmitters. Shortly after this, **Subterranean Sounds** came to the air, defending Live Wire by telling WNKR how totally crazy they were and saying that Live Wire is one of the most prominent Free Radio stations at present. Then **Ozone International** also joined the quarrel and mocked Steve Midnight of Subterranean Sounds for having boring programmes and few listeners. On November 6th, Steve struck back by having a live phone-in programme where dozens of listeners called in and supported Steve. In a recent phone call with Bill, he said that things have now calmed down and he believes that WNKR's unexpected attack on LWR was due to jealousy. Another remarkable fact is that Bill doesn't know any of the guys behind WNKR personally and there has never been any trouble between the stations before. JAL SPZ

Russian Radio and **South Hobby Radio** are two new Russian pirates that are active on 76 metres. The power is 50-100 W and both use the Box 29 address in Moscow. CT FRS

Radio Santa Claus is a one-off project by many of the German pirates that will be active over Christmas, most probably on 76 and 41 metres. FRS RB

From New Zealand, the operator of **Southern Music Radio** tells us that there will be no more programmes via **SWR Switzerland/IRRS**. The last programme went out on December 17th between 13-14. In 1995, the legal station **Radio Copan International** will relay SMR. All letters for these broadcasts should be sent to Box

452, Wellsville, NY 14895, USA. In addition to these relays, **Swedish Shortwave Relay Service** will continue to relay SMR as well as various US Free Radio stations. SPZ

Starshine Radio continues to be rather active on 76 metres. On October 23rd, the station was noted via **Radio Baltic International** on 6206 kHz featuring operator **Kim Hawk** who brilliantly sang a duet with one of the 60's classic tunes that were played! Starshine now uses the Wuppertal maildrop. SPZ

Radio Strike is a new pirate from Sicily which will be relayed via **Radio Europe** on 7294 kHz USB, **IRRS Nexus** on 7125 kHz and via **Radio Mariquita** on 4032, 4096 & 4115 kHz. Broadcasts will be carried out every two-three weeks. QSLs are available via BCL Sicilia Club, c/o Roberto Scaglione, via Generale Strevia 22, 90143 Palermo, Italy. BP

Subterranean Sounds was heard on 6276 kHz with a poor to fair signal here on December 11th. **Steve Midnight** announced a new mailing address of 5 Dolphin Court, 15 The Avenue, Branksome Park, Bournemouth, Dorset, BH9 2UN in England. The Salisbury address also still works for SS. DD SPZ

Transatlantic Radio was testing a new endstage on October 23rd and October 30rd. The signal was powerful but severe problems with the modulation quality was noted. However, the modulation problems are now sorted out and Transatlantic was well received on December 11th with tests on 6200 & 6279 kHz. The power of the new transmitting equipment is 120 W, which should be compared with the mere 10 W the station used before. SPZ

Radio Venus is a new Irish station that is thought to test soon on 6312 kHz or nearby with a power of 60 W. JC

Voice of Scotland claimed to be a new European pirate who tested to North America on Saturday October 1st on 6273 kHz at 23-24 UTC. The station was heard

by a number of pirate DX-ers in the USA, but nothing was heard in Europe! Our US correspondent Chris later found out that the transmitter as a matter of fact originated from the US (see his US column)! The DJ was Scottish-accented and mainly gave address and ID announcements. Music included a song by George Harrison. The power was 750 W. Address: Box 28413, Providence, Rhode Island 02908, USA. CI JB JC PP

WCMR were heard with their first broadcast on November 26th via **IRRS Nexus** on 7125 kHz. The station name is an abbreviation for "World Change Mission Radio" and proclaims that we should change our way of living. The station originates from Germany and will continue broadcasting by the facilities of other stations. There are plans on purchasing an own transmitter, however. WCMR use the Wuppertal drop. LAY

WNKR will be on the air 24 hours a day from Christmas Day until December 27th. **Angel** will be aired on Christmas Day and **Radio Joystick** will be aired on Boxing Day and December 27th. RB

XMAS will be back at Christmas Day and Boxing Day with their traditional, provocative programming. The frequency will most probably be 7558 kHz. FRS

MEDIUMWAVE NEWS

I guess you are all surprised to see me writing this column. This has been Derek's sacred column, but Derek has unexpectedly stopped listening to the Dutch pirates and most of his DPRS service has been dropped. Only the mail forwarding service will continue. Derek's mediumwave magazine *Alternative Medium Wave Pirate News* is no more and his verification service has also been ceased. The reason for all this is that Derek recently got a full-time job as a home carer of elder people and there is simply no time left for him to follow the Dutch mediumwave pirate scene. Of course, nobody will ever be able to fill the gaps that Derek now leaves behind him, but I want to continue this column and try to make the best out of it. Please note that this column to a great extent will depend on contributions, so please send in your logs and news for MW too!

Radio Bremen was heard by myself on October 23rd on 1648 kHz. Bremen has been known as a notorious non-verifier, but shocked me (in a positive way) by answering within a week! The station is also active on 1636 and 1660 kHz and has also plans to start shortwave transmissions in the 48 metre band soon. Power of this station is 550 W and it operates from Hengelo. The operator is Hans and he speaks good English. He says that he has plans on coming onto shortwave as well. A shortwave transmitter is soon finished and will work in the 6200-7200 kHz range. SPZ

Count of Luxemburg is the name of a new Dutch operation with 1200 W (!) from Hengevelde. This station was recently heard by Jonny. The address for the station is Box 10, 7496 ZG Hengevelde, The Netherlands. JAL

Japle de Bliizkikker, Billy de Bluffer, Twentische Rakker and Zendster Annita made

Stefan Printz
Kämnärsvägen 13D:220
226 46 LUND, SWEDEN
Phone: +46 46 137624

a joint transmission early in the morning of October 23rd on the unusual frequency 1588 kHz and was well received here. Actually it was the first time I heard a pirate station on that frequency. The station played a mixture of pop music, like Boney M, ABBA and Queen, and Dutch folk music. Only one announcement were made during the hour I listened and the address was given as Box 27, 7595 ZG Weerselo, The Netherlands. JTM SPZ

Station OXN was a station noted by Göran on November 26th on 1641 kHz. The station announced the address Box 180, Lelystad, The Netherlands. GÖP

Radio West was heard briefly during a QSO on October 23rd. I wrote in to the station and got a quick reply. The operator says he uses a home-built transmitter with the 4CX250B tube at the endstage, giving 300 W of power. Although West is a rather new appearance on mediumwave, the operator has been transmitting for a long time. Some of the old names were **Bonanza**, **Radio 538** and **Radio Schimanski**. The operator is 38 years old and operates from Flevoland. SPZ

Finally, here are a brief list of the most interesting stations I have heard the last two months:

Oct. 22	1637	Ome Jan	17.24
Oct. 22	1642	J. Peacon	22.27
Oct. 22	1643	Gouden Ster	21.48
Oct. 22	1649	West	17.15
Oct. 23	1588	Japle/Billy etc.	3.03
Oct. 23	1646	Radio Brescia	0.35
Oct. 23	1646	Radio Bremen	2.53
Dec. 10	1645	Dolfyn Radio	23.57

General information

When writing to a pirate station, never put the word "radio" or anything similar on your envelope. Use initials if possible, otherwise use the station name only. For example, if you write a letter to Radio East Coast Commercial, write "RECC" on your envelope followed by the listed address. Most stations require return postage, usually 2 IRCs, 2 USD or 2 mint stamps. IRCs (International Reply Coupons) are available at the post office. Many of the Dutch pirates can be contacted through an address forwarding service run by Derek Taylor of DPRS. If you use this service, you must include an extra IRC or USD note to cover the forwarding fee

Key to the signs

- ♡ - Or direct via DPRS, 12 Dorman Road, Preston, Lancs PR2 6AS, England
- ◇ - Can be forwarded by DPRS, although not direct
- † - Don't put station name on envelope!
- T - Tentative address
- - Tentative station name
- B - Belgian pirate
- D - Dutch pirate
- E - English pirate
- F - Finnish pirate
- G - German pirate
- H - Greek pirate!
- I - Irish pirate
- J - Italian pirate
- P - Italian private station
- R - Russian pirate!
- W - Welsh pirate
- Y - Yugoslavian pirate!

US PIRATE SCENE

Hello folks and welcome to another roundup of free radio activity in North America. Since we last met in these pages, a new pirate band has been established in the 6940-6970 kHz with limited success. Also, 7415 was occupied by KVOH for a while. As we write this, WJCR has been off 7490 for almost two weeks, so look for pirate activity here if they stay off. Lets get to the logs:

Captain Eddy of the **Radio Airplane** was heard on 6960 LSB on October 23rd with his usual campaign against cat farts and as usual he wasn't wearing any pants! He was also heard on Halloween weekend IDing as **Radio Scareplane!** This show actually brought Nemesis from **Radio Doomsday** back from the dead! Nemesis had to promise to resume QSLing and to be nice to John T. Arthur, the operator of the Wellsville, NY drop. Heard on 6955 USB at 2355 on October 29th-30th. We hope Nemesis lives up to his part of the bargain. Radio Airplane also aired their second anniversary show on November 20th on 6955 USB.

Altered States Radio with host William Hurt aired their Halloween show on October 30th on 7375 kHz at 2210. Music by Black Sabbath, Alice Cooper and and Frank Zappa was heard.

Anarchy I, a Western North American pirate which was been inactive for quite some time, has reappeared with good signals on the East Coast! They were noted on the new 43 meter band on October 22nd on the frequency of 6965 LSB at 2229 UTC. They sign on with the theme

Chris Lobdell
 P.O.Box 146
 STONEHAM
 MA 02180, USA

from Superman and featured Capt. Anarchy with talk about hemp.

Radio Azteca, one of the most active pirates of the past two years, was heard on 7415 kHz on both October 8th and 15th, on November 6th on 6963 kHz and on November 26th on 7470 kHz. Host Bram stoker uses both original and borrowed comedy and is probably one of the funniest of todays pirates. The station uses the slogan "all that is gross but tasteful". His "Ask Dr. Radio" segments are particularly funny. One broadcast was even picked up by Rainer Brandt in Germany!

Count Whip is still sailing around in West Indies in his cruise ship getting bored and broadcasting his **Caribbean Sound System**. He was heard several times. They were heard on October 16th on 7415 LSB, October 24th on 7450 LSB, and on 6955 kHz on November 19 and the 24th. The last show was quite funny and featured a cruise with the executive council of the **North American Shortwave Association-NASWA** on board!

The **Crooked Man** is a station that hasn't been heard from in a while. Anyway, they showed up on 6960 USB on October 28th. The OM announcer said he was from another planet who survived the Hindenburg explosion in the late 1930s.

We all remember how Nemesis blew his brains out on his show in early September. Most of us thought he was gone for good, right? Wrong! Captain Eddy of the **Radio Airplane** brought him back to life on the Halloween weekend. **Radio Doomsday** celebrated one year of existence with their first anniversary show. It was aired on November 19th through the 20th on 6954 USB from 2326-0100. This is probably one of the longest North American pirate broadcasts since a **WSKY** show a

few years back. Reception conditions were good and the broadcast was widely heard.

Down East Radio, the pirate station from the State of Maine was heard on both September 25th and October 2nd on 7415 kHz. Oscar Guggins and his offspring Oscar Guggins Jr. were heard with more Down East Humor. We understand that after his last show, Oskar took off to vacation in Florida leaving Oscar Jr. in Maine with his new love.

A new station using the call letters **FAQ** appeared with some test transmissions on 7470 USB at October 9th at 0000. They were also noted on 7415 kHz on October 15th at 2328. During these tests, music by The Eagles was played. They sometimes IDed as "FAQ, a North American Pirate Relay Service". This confused some listeners who thought that they were connected with the NAPRS. Richard Pistek has said that FAQ is no way connected with the North American Pirate Relay Service.

Radio 43, yet another new station was first heard on 6955 USB on October 23rd from 2329 to 2347 UTC. The OM announcer played the music from the "Outer Limits" TV show and talked about little green men from outer space. Life on the planet Mars was also discussed.

What would pirate radio in the USA be like without Captain Ganja in the Garden of Herbal Delights? Well, his station **Radio Free Euphoria** was heard on 7445 kHz at 0307 UTC on the 7th of November. Music like the "Space Cowboy", "The Pusher" and with fake ADs. A couple IDs were made by that Hot Babe from KMOM, Samantha Jones.

H.V Short from **RFM** hit the airwaves again on medium wave 1625 kHz at 0200 on the 29th of October and again on November 20th on 7436 kHz at 2220 UTC. H.V. likes to play New Age music, and a few comedy spots that he produces.

What would Halloween weekend be with

Radio Hallowe'en. Well, this year there was both Radio Hallowe'en and Hallowe'en Radio! **Halloween Radio** was heard in the AM mode at 2302 on 7445 kHz on the 31st of October IDing as "Broadcasting from Hell, this is Halloween Radio". Lots of goulsh type music was heard such as "I Love The Dead" by Alice Cooper.

Radio Hallowe'en was back for its third straight year also. They were noted several times, including their Sunday AM airing on 7415 USB at 1430 on the 30th of October. Programming was similar to last years' and included the haunted mansion in Mississippi. They were also heard in Europe on both 6295 and 7420 kHz in the 1000-1100 UTC slot thanks to some pirate friends over there. According to the station op, Tommy Pickles, almost 20 reports were received for these relays!

Not to be left out in the cold for Hallowe'en, **Hit Parade Radio** was also noted on 6964 kHz at 0000 to 0041 with a countdown of the Top 10 Hallowe'en songs on the 29th of October. Due to propagation, signals were rather weak.

Another new station, **Jurassic Radio**, was heard for the first time on 6969 USB at 0200 on the 23rd of October. They claimed to be broadcasting "from the continent of Tangia" with your extinction in mind. "All dinosaurs, all the time". The station was only heard once, so maybe it became extinct too!

One of the few active stations from the western part of North America, is **KDED**. They were heard several times, including 7480 LSB on the 2nd of October, 7465U on October 15/16 at 2356, and on 7475 LSB on October 31st. The station's format is music and information on the group The Grateful Dead.

KICK, the heavy metal rock and roll station, was heard with their Halloween show at 0120 on 7445 kHz on the 31st of October. In order to get your QSL, reception reports had to be written in blood! Pete, do you think red pen would be accept-

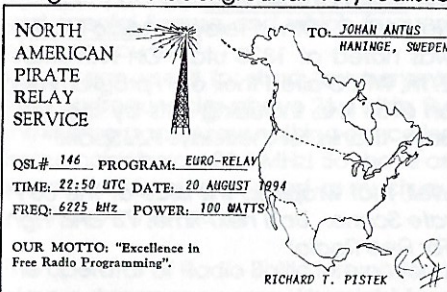

able?!

KTVI made two recent outings. They were heard on 7470 USB at 0130 on September 26th and on 6955 USB at 2300 on November 13th. On the latter show, music by Queensryche was heard. This broadcast was picked up by DXpert Rainer Brandt in Germany. This made station operator Emmanuel "Manny" Goldstein very happy!

K-2000, "The Loose Cannon" has the best produced pirate shows that I can remember. Unfortunately, the propagation gods did not cooperate this time around and their Halloween special on 6967 LSB at 0300 on the 30th of October was not well heard. Too bad, it must have been a great show. We will hear more from Bob Rock in the future, I'm sure!

Microdot Radio was heard on the 2nd-3rd of October at 2340 on 7414 kHz with their Woodstock Trivia program. Music included Alice In Chains, The Doors, Pearl Jam, Smashing Pumpkins etc. Even a few Beavis and Butthead clips were thrown in for good measure. A one shot deal? We're not sure.

Dick Pistek of the **NAPRS** treated us to a relay of **Radio Mirage International** the 25th of November on 7415 LSB. The program was repeated two times more as well. Host Ian Paige treated us to an entertaining mix of music from French and German bands. We could also hear the sounds of sea gulls in the background! Very realistic.

Primitive Radio features poetry and unusual music in their programming. Holden was heard on November 6th at 1345 on 7415 LSB. Their QSL card is quite attrac-

tive, it features ancient cave drawings of animals.

Quantum States Laboratories likes to dabble in what they call shortwave "mind control experiments". They were heard several times including 7469 USB on October 16th, 6965 USB on the 29th of October and on 6955 USB on the 13th of November.

The **Voice Of Scotland** was supposed to be a Euroirate testing to North America. They were heard on the 1st of October at 2308 to 2328 on 6273 kHz playing music by George Harrison. Many people in the USA heard it, but no one reported reception in Europe! Anyway, your editor did some checking and found out that this was a hoax and they transmission originated here in North America. The program may have been taped in Scotland though.

Dr. Love of **Solid Rock Radio** can't let a month go by without appearing on the airwaves. He was heard on October 9th on 7465 LSB playing a mix of music by the Carpenters, Cher and Gary Puckett. Audio was distorted. SRR was again noted on 7470 USB on October 16th. The music of Ray Charles was featured on his show of November 27th on 7415 kHz.

From "the South Island of New Zealand" is how the op introduces his **Southern Music Radio** relays. They were heard on the 1st of November on 6958 USB at 0133 UTC. A program of New Zealand and Aussie music was featured.

SPAM Radio, the station will always be known as having the most disgusting QSL ever. Anyway, they were heard on the 31st of October on 6965 USB with "Jingle Bell Rock", Monty Python's Spam Skit and the Underwear World Of Jacques Cousteau. Poor King Spam, how will he ever overcome that QSL!

The op of **Radio Doomsday** treated us to a relay of the Swedish Pirate, **Starshine Radio**. They were heard on 7490 kHz at 2300 on November 27th. Played a lot

of oldies such as "YMCA", "Kung Fu Fighting". I thought the best part was when the op sang along with Lee Marvin in the song "I was born under a wandering star" which I think was from the movie "Paint Your Wagon". Whoever you are, keep your day job! Thanks for the relay, Nemesis!

The well known Europirate **Radio Titanic International** was heard with their 19th anniversary program on November 12th at 2100 on 6960 USB. It was also repeated on November 13th on 7412 kHz. The DJ was Duncan James and featured music by Procul Harum, Fleetwood Mac and Michael Jackson. We will be looking forward to their 20th anniversary.

Radio Toronto was another new station noted. They were heard on November 26th at 6955 kHz around 0330 and again at 0500. The OM announcer was testing playing music. A phone number was given to call into.

Up Against The Wall Radio, the station operated by Owlsey was heard many times. The best heard show was their Thanksgiving 1994 special. Noted on November 24th at 2300 on 6955 USB. The cult favorite Alice's Restaurant song by Arlo Guthrie was heard along with the Adam Sandler Thanksgiving song. The station always signs off with their trademark an "ooogah" claxon type horn. They hope to do more relays of other stations in the future.

SAMURAI RADIO

Chico

This is to confirm your reception on 7415 kilohertz.

From 0325 to 0414 UTC on the date of March 31 1991.

We have checked your report and found it correct.

Thank you very much.

13 *Eddie Currents*
Eddie Currents

Radio USA, North America's oldest continually active pirate was heard on October 29th at 2135 on 7385 LSB with Joe King, RF Watt and the Halloween show featuring "Scariest Than Monsters" news.

A new station, not widely heard was **The Voice Of Broadcast Freedom**. Heard at 2232 on 7413 kHz on October 8th with a song by XTC and talk about the FCC. The woman's voice was hampered by a heavy echo. An interesting station that I hope we hear more from soon.

Witch City Radio was back on for Halloween, claiming to be broadcasting from the City Of Witches, Salem, Mass. Heard on 7445 USB at 0000 on November 1st. Old movie promos, and scary tales were heard. Not heard by many due to poor conditions.

WLIS "We Love Interval Signals" was heard on November 7th at 0044 on 7445 with a salute to DXer Harry Smith. They were also heard on November 13th at 0133 with a Glenn Hauser salute.

BROADCASTING FROM THE USA

Solid Rock RADIO

We're Glad You Caught Our Signal
And Not Us!!

Date: 9-20-94
Time: 22:35 - 22:46 UTC
Frequency: 6235 kHz
Reporter: John Antez
DR LOVE

WREC, also known as **Radio Free East Coast**, was heard several times with their nice AM signal. They were heard on October 15th at 2256 at 2250 with a relay of **Laser Hot Hits**. Also noted on the 1st of November at 0035 to 0056 with a relay of the **Voice Of The Dead** on 7471 kHz. On November 20th, a relay of **Radio Marabu** was noted at 1830 utc. On November 27th, WREC aired their own programming on 6965 kHz, including skits by the Jerky Boys. Thanks for the relays P.J. Sparx!

Well, that wraps up this issue of The US Pirate Scene. Until next time, 73 and Fight For Free Radio!

The Telecom in pursuit of Radio Baltic International

Stefan Printz
Kämnärsvägen 13D:220
226 46 LUND, SWEDEN
Phone: +46 46 137624

Radio Baltic International is in great danger! A while ago, the operator received a letter from the Swedish Telecom who told him to stop the transmissions on 6206 kHz immediately, since he has no broadcasting license. Furthermore, the Telecom said that it is illegal to relay satellite radio stations which Baltic has done several times (e.g. Holland FM and Radio North-sea). As soon as I was informed about this news, I called the operator of Baltic and asked him what was going on:

SPZ - What are you going to do now, after the letter you got from the Swedish Telecom?

RBI - Nothing! I will continue as before! It's my right in accordance with human rights to broadcast. The satellite relays will be dropped however, they have just been used to fill the gaps between programmes.

SPZ - But your transmissions are illegal. Won't you at least reduce your high activity?

RBI - No, I have replied to them that it is my right according to the law of freedom of speech to broadcast. I have a special license that can be used for test purposes and I will apply for a license on shortwave.

SPZ - How much can you broadcast with that special license and which frequencies can you use?

RBI - I can use it for short test transmissions on frequencies above 26.1 MHz. But the license papers says nothing concerning frequencies below 26.1 MHz! So I have assumed that I can broadcast as much as I want to on shortwave.

The operator of Radio Baltic International plays a dangerous game. He might face great trouble with the Telecom if they should decide to track him down. But the operator says he's tired of waiting for a li-

cense and will continue to broadcast as before:

RBI - The Telecom hasn't even answered to my letter with questions I sent them after I got their complaints. I should have the right to get an answer at least. I can see nothing wrong in using an empty frequency. I harm noone. Instead, I have activated many through my relay service. Even a (Swedish) school class sent me a tape and I should tell this to the minister of education! I've been transmitting for 32 years and I applied for a license 30 years ago. It's time I get a license! Why not set up rules for amateur-based domestic radio, just like the rules for amateur radio? I will never give up.

The RBI operator's cheap relay service has attracted many stations. Loads of tape recordings are received all the time. A problem is to spread the air times between the stations. Most stations want to be relayed on Sundays between 9-13 UTC, which is the time when most people listen to the 48 metre band.

RBI - I recently discussed this with **Lasse Karlsson** of **Radio Nord**. We want more Scandinavian stations to come on the air. The Scandinavian stations will get airtime on Saturdays whilst the others will be put on Sundays.

During the Christmas period, the Baltic transmitter will go very hot. Many stations will be relayed, including **Radio Nord**, **Radio CLCG** and **Radio Royal**, to mention just a few.

RADIO STRIKE

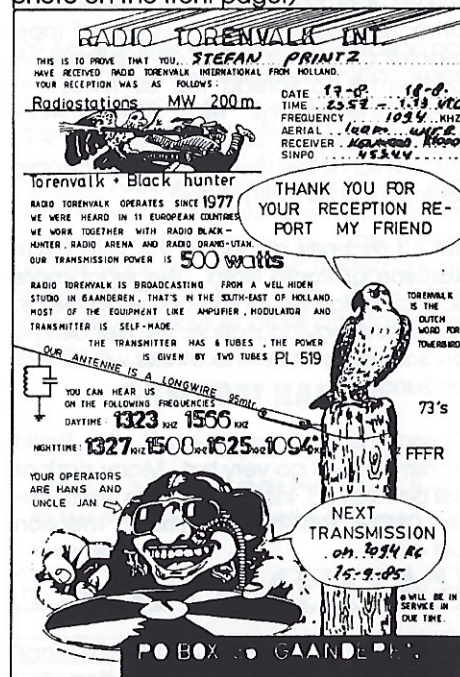

"the first pirate in Sicily"

Beneath the mask: Radio Torenvalk International

Stefan Printz
Kämnärsvägen 13D:220
226 46 LUND, SWEDEN
Phone: +46 46 137624

During the hey-days of "international broadcasting" on 1508 kHz in the mid 80's, Radio Torenvalk International from Gaanderen in Holland became my favourite pirate station. They were one of few regular broadcasters during that period and had quite a different style of programming comparing to the other Dutch mediumwave pirates. The sound was fresh, with lots of jingles, cuts and echo effects, not to mention the impressive line-up of DJs with main operator **Hans, Steve Most** (Radio Pamela) and from a studio in London, **Russ & Louise Revenge**. We were many DX-ers at that time who eagerly tuned in to 1508 & 1094 kHz each first Saturday night of the month, waiting for Hans and his technical engineer fellow **Uncle Jan** to switch on the transmitter... (see the photo on the front page!)

The QSL-sheet from 1985, made by Hans.

The history of Radio Torenvalk International

nal goes back to the late 70's, when the mediumwave band was crowded with different stations on the well-known 227 metre band. The first transmission by Torenvalk went out in 1977. Between 1979 and 1982, they broadcast international programmes on 1300, 1323 and 1327 kHz. In the beginning of the 80's, the 227 metre band became more and more occupied by powerful legal stations and so the activity on the band phased out. And Radio Torenvalk International was just one in the big crowd of international broadcasters on mediumwave.

In 1985, fellow pirate **Radio Orang Utan** began transmissions on 1508 kHz and this was the starting shot for many other Dutch mediumwave pirates to relaunch international programmes. 1508 kHz appeared to be a very suitable frequency after **BRT** from Belgium signed off at midnight. Torenvalk was one of the stations who took the opportunity to try the frequency and they had an immediate success with lots of listener letters and good response to their programmes.

In July 1985, Torenvalk wanted a frequency "of its own" and found a number of free frequencies in the 1050-1100 kHz range. However, a move could imply that Torenvalk lost listeners. A successful test broadcast was made on August 4th on 1094 kHz with many letters being received. Especially the UK listeners reported the frequency as "very free".

Torenvalk continued their schedule of at least one transmission per month. In addition, many pirates were relayed, including **Radio Pamela** from England and **Kiwi Radio** from New Zealand. The 1508 kHz transmitter was later sold to **Radio Pelsjager**, another international broadcaster from the late 70's and mid 80's.

In February 1986, **BBC Radio One** caused problems to Torenvalk's signal. The carrier of the BBC signal on 1089 kHz never closed and Torenvalk had to move back to 1508 kHz. Also 1611 kHz in the 186 metre band was used a few times. Hans and Jan first thought the BBC were interfering them on purpose, but later they found out that they kept the carrier on in order to prevent the aerial wires from icing up during the severely cold February nights! In May 1986, BBC One closed normally at 0.30 again and Torenvalk could return to 1094 kHz.

The recording studio, February 1986.

However, the broadcasts were on an occasional basis now and Hans & Jan seemed to gradually lose interest in continuing the mediumwave service. The last broadcast I heard was on June 13th 1987. I guess they closed for good on mediumwave after that.

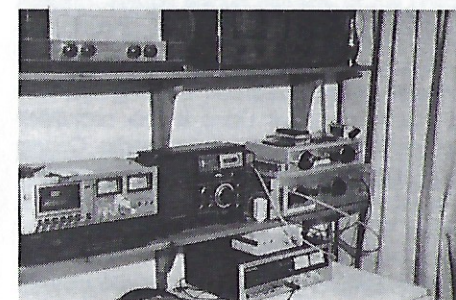

But that doesn't end the story. Hans came back on shortwave the following year in a joint project with **Radio Tonair** called **Radio New World**. The project was rather short-lived however, and apart from a few tests in the beginning of 1989 on 48 metres, years of silence followed. This was the definite end of Torenvalk, I thought.

Luckily, I was wrong.

The classical sticker from 1985.

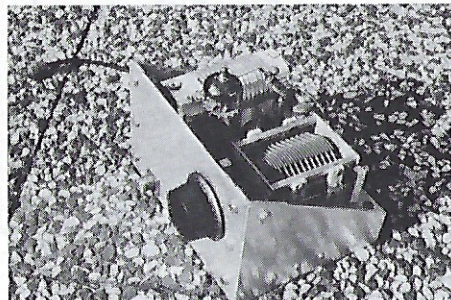

In spring 1994, I heard rumours that Hans was on his way back with a new transmitter. Since there always circulates lots of unconfirmed stories in the world of Free Radio, I doubted this, although one or two DX-ers said they had heard a test by Torenvalk. Once again, I was wrong. October 2nd 1994 saw the definite return of Radio Torenvalk on 6275 kHz in the 48 metre band with the first official programme. The day before, a test had been carried out on 6207 kHz. A very nostalgic feeling caught my body. Many of the sounds and tunes were the same as in the mid 80's, such as their station tune "Street dance" by the Break Machine. A second programme was carried out on October 30th on 6275 kHz with a one hour show.

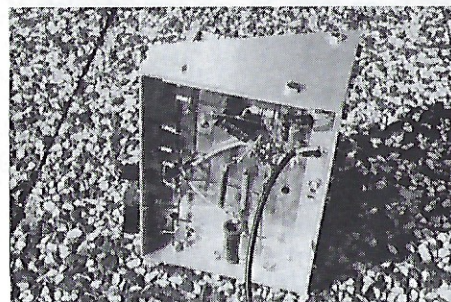

Radio Torenvalk's shack 1994.

Hans is now running the station on his own, but he receives good support from his girlfriend who he met during a night-transmission on 1323 kHz in 1980! "This is the best thing that has happened to me

in connection with Free Radio", says Hans with a smile on his lips. She was a member of the **Radio Helderroosje** crew and after the QSO with Hans, they fell in love with one another! Now they live together in a house in Zeddarn.

The 100 W shortwave transmitter, 1994.

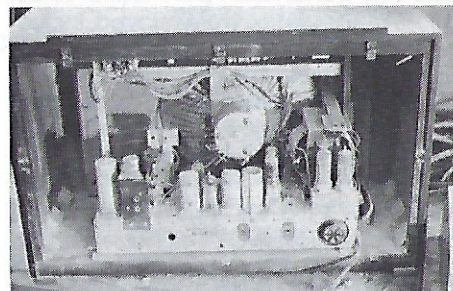

The back of the transmitter.

Hans is now 32 years old and have been a dedicated radio enthusiast for 16 years. The technical side of the hobby has interested him most (apart from his girlfriend!) and Hans has always been building transmitters and modulators. And I guess few of you know that Hans is the architect behind the transmitters of **Radio Orang Utan**, **Radio Tonair** and **Transatlantic Radio**. His own transmitter is built with three tubes, EF80, EL84 and PL519 which gives appr. 100 W. The modulator is based on five tubes and gives 150 W audio power. As antenna, Hans uses a halfwave end-fed longwire antenna, although he previously used a half-wave dipole.

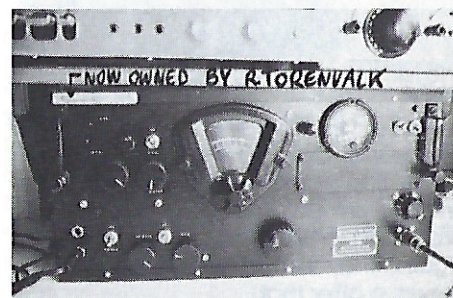

Another hobby Hans has is fixing up old tube radio receivers. He has a collection of 35 radios from 1933-1956. A collection

which would be very interesting to watch, I believe!

One of the tube receivers in Hans's collection.

The risk of getting caught by the PTT has increased the last couple of years, and because of that, Hans is broadcasting on an irregular basis. He has been lucky to never have been caught during 17 years of operation which is rather surprising for such a long-lived station as Torenvalk. Broadcasts will be carried out on 6275 kHz about once every month. Hans always welcome letters, reports and comments and the address to write to is Box 94, 7038 ZH Zeddarn, The Netherlands. As Hans has thorough knowledge in building transmitters, he also can give you technical help and advice on how to build your own transmitter or other technical issues.

Another transmitter at Hans's studio, previously owned by the PTT!

So tune in to 6275 kHz guys, the kestrel has returned!

RADIO TORENVALK INTERNATIONAL

THE NETHERLANDS

FCC SEEKS INJUNCTION TO GAG MICRO POWER BROADCASTER

On Tuesday, October 10 attorneys for Stephen Dunifer and Free Radio Berkeley received notice, 80 pages worth, of the FCC's intention to seek an injunction which would bar further broadcasts by Free Radio Berkeley. Stephen Dunifer is named as the responsible party. Free Radio Berkeley is part of a rapidly growing movement which uses inexpensive and low power radio transmitters (1/2 watt to 30 watts) to reach local communities. Called micro power broadcasting, this movement sees simple, easy to use transmitters as the leaflet of the 90's. In an era of multinational controlled mass media, micro power broadcasting is the voice of the community; the voice of the people. For four years the government has been trying to squelch this movement with escalating (but uncollected) fines. Clearly, it sees broadcasting which anyone can do as a threat to centralized control of information, ideas and culture. Intimidation having failed, the FCC is abandoning its own procedures and turning to the weight of the Federal Courts to squelch this new and democratic media. It won't happen.

Last July the FCC served a notice of apparent liability on Stephen Dunifer in the amount of \$20,000 for alleged illegal broadcasts. This case has been pending before an FCC administrative panel for over a year. In July 1994, a Federal Appeals Court in the District of Columbia ruled that the FCC's current fine structure was invalid. This action, at the very least, places the FCC fine process into a state of limbo until new hearings are held. Perhaps this explains why the FCC has taken this mode of attack.

Luke Hiken, attorney for Stephen Dunifer, stated, "This is a totally unprecedented move on the part of the FCC. It appears they have side-stepped their own authority regarding micro radio broadcasting. Instead, they have chosen to bring down the full weight of the Federal Court System on an ever expanding community of broadcasters who are challenging the FCC's ban on micro power broadcasting." (continued)

"They can kiss my Bill of Rights" was Stephen Dunifer's response, who went on further to say, "Neither myself nor the movement to liberate and reclaim the airwaves from corporate control will be deterred one bit by the FCC's latest action. It is a matter of free speech and human rights. No where in their prodigious legal tome does any aggrieved party come forth, other than the FCC, to assert damage or harm. FCC, in my opinion, stands for fostering corporate control. Free Radio Berkeley has been on vacation for the last few months in order to allow time to put together new

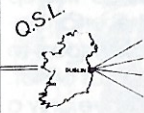

equipment. Broadcasts will resume shortly at a new frequency, 104.1 FM, and continue until the date of the first court hearing. If an injunction is granted, there are many others taking up the banner of Free Radio Berkeley. We shall not be moved nor stymied by a justice system which means, in reality, just us corporations."

Another member of the legal defense team, Allen Hopper, put it this way, "It is utterly amazing that the FCC would seek a TRO, which is only sought for emergency situations where the threat of immediate and irreparable harm requires the intervention of the Court. The fact that the FCC has had this case pending before its own administrative panel for over a year contradicts any notion of emergency or injury. Further, their actions clearly demonstrate the fear they hold for the kind of public dialogue which takes place over micro power radio."

Luke Hiken and the National Lawyers Guild Committee on Democratic Communications are committed to defending the rights of micro broadcasters under the US Constitution and principles of international law.

At this moment, a hearing on this matter is scheduled to take place on December 2 in Federal District Court in Oakland starting at 10:30 AM. A Free Speech Solidarity Support Rally will be held outside the Oakland Federal Building prior to the hearing. On the following evening (Saturday, December 3) a public forum flying the banner of - Seizing the Space, Media and Communications Free Speech Activism - will be held in Berkeley at the Unitarian Fellowship (Cedar & Bonita). Starting time will be 8 PM. Simultaneous forums on this topic will be taking place in a number of other cities around the US, and perhaps internationally as well, on this date.

Complete media packets will be sent out upon request. Please contact Free Radio Berkeley, (510) 644-3779, (510) 464-3041.

RADIO SPARKS

Greetings from Switzerland! My name is DJ Stevie and I am the operator of Radio Sparks. We are broadcasting via IRRS in Milano. I am a friend of Yves of **International Music Radio** and he gave me a copy of Pirate Connection 9. I had to laugh a little, because the information was a little bit wrong. So now I will clear it up and give you information about Radio Sparks.

I was born in England and left when I was very young. I lived in Ireland (a beautiful place) and in Israel. I moved to Basel in 1984 and have been here ever since. I am now a Swiss citizen and married, but don't have any children.

I have never received any reports from the USA (I'd love to) or Africa. I have only received reports from Europe.

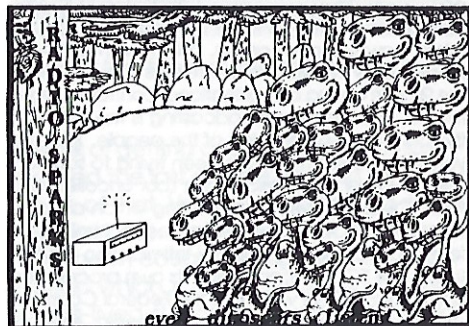

Radio Sparks started broadcasting on July 2nd 1994 via IRRS. Till now we have received over 100 reports.

We will be broadcasting next year via IRRS and IMR. Our shows via IMR will be live and sometimes just tapes. The frequency that we will be using will be 7380 kHz or around depending on the conditions.

We always have a new QSL for every show via IRRS. Our mailing system is excellent. Every listener who has written to us is kept in our files. This way we will never make any mistake like sending the same QSL twice. It's a lot of work to keep this up to date, but it's worth it in the end, because we don't have to look for hours to find out if a listener has written to us or not. I have seen other pirates who have only a mess and really couldn't care about their office work.

In January next year, Radio Sparks will have its own shop. A list of what we have

to sell will be sent out with every QSL card. This is a non-profit shop. We want to please the listener, not rip him or her off. I know some stations who really take far too much money for nothing. I thought this was a hobby and not a job.

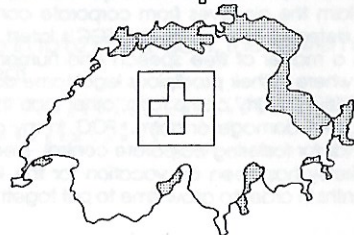

Our QSL-card.

Our competitions are very easy. The first prize is always a Radio Sparks T-shirt. The print that we use is the QSL card with the dino's on it. Second and third prize are tapes and sometimes CD's. The tapes that we give away are always top artists: U2, Cure, Depeche Mode etc.

Radio Sparks, IMR and Radio Calypso (another Swiss station) will be on the air via IRRS on Christmas Eve for a few hours. On New Year's Eve, IMR and Radio Calypso will be on the air again for two hours or more. On January 7th, Radio Sparks will be on the air for a special 2 hour show. Maybe on Christmas Day. All of us will be on the air live via IMR for a few hours.

The complete story of International Music Radio

DJ Yves
P.O.Box 1951
79554 WEIL/RHEIN
GERMANY

International Music Radio was founded by me in autumn 1993 and my first programme went out on October 31st 1993 via **Radio Orang Utan**. In spring 1994, I was relayed by IRRS in Milano a few times. But the real birth of my station was on August 19th 1994. Then I got my own transmitter working well, at last! My first QSO was with **Radio Pacman** and since then I'm very active on 76 metres with QSO's and programming.

So far I have received reception reports from the following countries: Belgium, Holland, Germany, Switzerland, France, England, Italy, Norway and Sweden. I'm active Wednesdays and Saturdays from 17.30 UTC on the 76 metre band. I mostly do QSO's, but I also make programmes which goes out around 23 hours UTC. At most, my programmes are 40 minutes long. I'm also relaying my good friend DJ Stevie of **Radio Sparks** on 76 metres.

My Yeasu transmitter.

Very few letters came for my 76 metre broadcasts, so I decided to test on 41 metres. My first broadcast there was on October 2nd on 7380 kHz. It was quite successful with good signals on the continent. My shows on 7380 kHz will continue on Sundays from 9 UTC, but 76 metres is still my main band, especially for QSO's.

My transmitter is a Yeasu FT747GX and my antenna is a 41.5 metre longwire, hang-

ing 6 metres above the ground. The maximum power of the transmitter is 100 W, but usually I use reduced power, 50-70 W. I also use an automatic antenna tuner, FC757AT. Unfortunately, I have no cooling system, so the transmitter easily gets hot and I often run into different troubles!

The Yease FC757AT antenna tuner.

I also plan to go on FM as soon as possible. I will buy a transmitter from the USA as soon as I get enough money.

All the Swiss pirates, including myself, are going to the EDXC Conference in Denmark in 1995. A great event that I hope many of you will attend. Maybe we will see you there.

QSL-Collection

Edited by Jonny Augustsson

That was another 365 days and now we have to go thru some new ones. New stations and new QSL-cards to come. Don't forget me!!! Anyway, we have some contributions here, pleasant reading.

Station					
<u>Mediumwave</u>	<u>Freq.</u>	<u>Reply</u>	<u>Rep.Time</u>	<u>Contr.</u>	<u>Bribe</u>

Turtle-list

1. R.Bremen	5 years
2. Drentse Claudia	52 weeks
3. Brittain R Int'l	44 weeks
4. Tele R. Stereo	40 weeks
5. R.Pandora	36 weeks
6. R.USA	30 weeks
7. Christ Gospel BC	29 weeks
8. R.Esoterica	27 weeks

Black-list

Radio Adelante
Free Radio Norway
Radio Psychodelica
Radio Paradise
Radio East Coast Com.

The only way to get OUT from the turtle list, are by sending fast reply's to alot of DX-ers. When we see the tendence, we remove you. The same with the Black-list.

Valentin Jershov	VJT	8	(Est)
Magnus Jespersson	MJT	2	(Swe)

Don't forget to include the frequency and IF you use shortwords that is not explained here, EXPLAIN them!

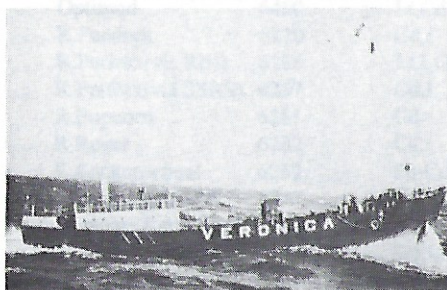

OFFSHORE RADIO

There's little news of real offshore radio at the moment, the only true offshore radio station still broadcasting in the world is **Arutz Sheva** off the coast of Israel.

Former offshore radio ships have been in the news a lot recently, one making a lot of headline is the former Laser ship **Communicator** which has been purchased by **Holland FM**. The ship has been refurbished and fitted with new transmitters and a 57 metre high mast and is now berthed on the **Ysselmeer**, an island lake near Amsterdam.

Holland FM were recently taken over by the **Veronica Organisation** and from 1st September 1995, the Communicator will operate under the Veronica banner. It is strange that Veronica started life as an offshore broadcaster in 1959 and continued offshore until 1974. It has become one of Holland's largest broadcasting groups. Holland FM broadcasts on 1224 kHz and whilst it isn't offshore radio, at least the Communicator hasn't ended up in the scrapyard.

Meanwhile the former Radio Veronica ship **Nordeney**, that has for some years been used as a floating restaurant and discoteque, has recently been extensively refurbished. The ship is now moored at Leeuwarden in the Netherlands and is back in use as a restaurant and discoteque.

LONDON W7 2LL
ENGLAND

The remains of the former Capital Radio ship **King David** were recently sunk. The ship had been in use until recently as a floating quay at a shipyard in Hereweerd in Holland. All the superstructure had been cut away to deck level. The wreck is now used for practice by a local diving club.

The commercial news station **AM Nieuws**, which is due to come on air soon, is hoping to use the **REM Island**, off Noordwijk, as a base for its 120 metre high transmitter mast. The REM Island was briefly the base for **Radio and TV Noordzee** in 1964, before it was raided and forced off the air by the Dutch authorities.

The exhibition of the Dutch offshore radio era at the **Omroepmuseum** that ran this summer was a great success. Just over 11000 people visited by the time it closed on Sunday 4th September. It is understood that some of the exhibition exhibits will be transferred to a permanent offshore radio museum on board the MV Communicator.

In the offshore radio rumours and unconfirmed department, **Radio Southwinds** plan to broadcast offshore from a ship in the Caribbean on FM and possibly MW and SW. There will be international programming reflecting the "warm breezes of the Caribbean". Radio Southwinds are looking for office, on-air and engineering staff and can be contacted at their E-mail address rsowinds@aol.com.

On the other side of the world, the opposition party in Kenya have stated that if they aren't allowed airtime on state radio and TV, they'll set up their own offshore radio station.

FREE RADIO TECHNIQUE

Edited by Jonny Augustsson

I came across a nice piece of art a few months ago on Internet, it's an amplifier for your FM-transmitter! Yes, good stuff and easy to build. I think that the schematic and the text from the file is good enough, and I don't have to do any extra explanations. Here it comes:

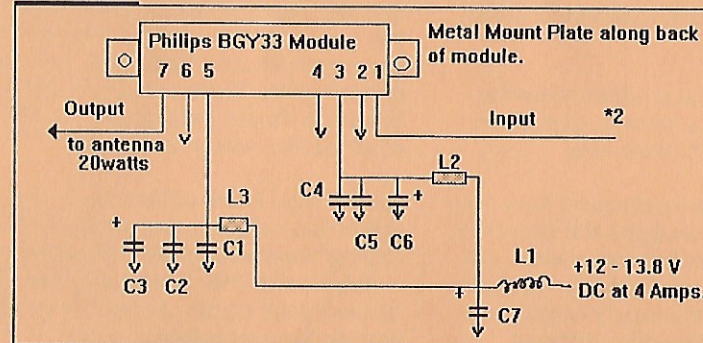

A 20 Watt Pirate Radio Station RF Power Amp by J. J. & Company

Parts List:

U1	BGY33 Philips RF Power Module
L1	5 μ H high current RF choke, Hammond #1539M10
L2,L3	Large ferrite beads, #2643006301 by Fair-rite Corp.
C1,C4	1000 pf disc capacitors
C2,C5	0.1 μ F mylar capacitors
C3,C6	10 μ F 25 volt Tantalum capacitors
C7	1000 μ F 25 volt electrolytic capacitor

And one medium sized finned heatsink capable of dissipating 30 watts (the heatsink should be rated at 1.5°C/Watt or less)

Schematic:

V is the symbol I am using to represent Ground (negative connection)

*2: Input 80 to 108 MHz at 50 to 100 mW from lowpowered FM radio transmitter.

If you have any problems reading the diagram, let me know and we'll have a private lesson, hi. Happy New Year to all of you!
